Sorry, sold out of bare root materials (except roses
and peaches for the season)

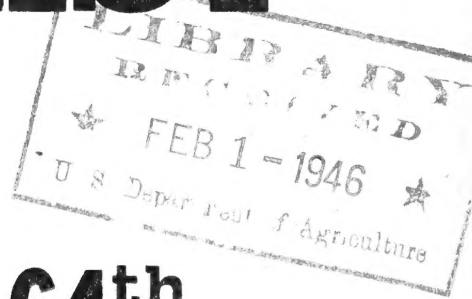

1946 PRICE LIST

1882
1946

64th
Year

IT'S BEEN so long since we could talk, act, or even think, as normal nurserymen should, that, NOW THE FIGHTING IS DONE we hardly know what to do! First though, we want to crow a little.

We think that, by and large, and notwithstanding various deterrents, not the least of which was weather, our performance as a Company last season was good. Perhaps some of you people who were unlucky with your orders during the winter may take exception to that statement. However, we handled approximately 4,000 orders here at Glen alone, in our fiscal year just past, with a force about 35% below normal. Actually, we sold 20% more retail orders than average with one-third less help. That should mean that somewhere along the line our efficiency rating jumped 55%!

Not much change in supplies of nursery stock this year; fruit trees and roses remain VERY scarce, although in spite of drought and floods, quality is generally excellent. When placing your orders therefore, don't wait for planting time, but let us have them right away, for shipping at the proper season. This will work to your advantage, as well as ours, and do a lot to reduce the congestion here in December, January and March. Also, please remember that anything B&B or from pots can be handled well during summer and early fall.

We don't often do this, but consider the occasion important enough to warrant it—**PODOCARPUS HAS BEEN REDUCED IN PRICE.** And, we are also offering this season, for the first time, Podocarpus Seedlings and Longifolia at still greater price savings, see page 5 of this list. All this means that now you will be able to use Podocarpus (Oriental Yew) as you would Ligustrum—for hedges, borders, foundation plantings and incidental specimens. In our opinion there is no finer evergreen in its class.

Again we stress two of the four points of last year:

- (1) Please order as early as possible after you receive this price-list.
- (2) Do not expect split-second deliveries and try to avoid specifying either shipping or arrival dates to the very day.

OUR BEST THANKS to customers of 1944-45 with a hope that the going may soon be smoother.

WE USE IT HERE—RELIANCE AZALEA AND CAMELLIA FERTILIZER

In response to many requests of our customers, we are happy to offer this scientifically blended plant food for the acid-loving plants. We recommend at

least two applications a year—more if the soil is very light. A RELIANCE booklet entitled "Azaleas and Camellias" is available here on request. It gives a lot of good information about

these plants and suggestions for their care.

NEW PATENTED ROSE MABELLE STEARNS

Because of the great scarcity of Roses all over the United States, we have been unable to procure our usual quota of Patented Roses for this season. We hope that this condition is but temporary and that we may again have the choice varieties of the new Patented Roses.

However, we are very fortunate in having the exclusive distribution for Florida and Southern Georgia, of the lovely Mabelle Stearns dooryard rose.

MABELLE STEARNS. H. Setigera. Plant Patent No. 297.

The flower is fully double, with many sharply re-curving petals, pale silvery pink on the outside, shading deeper toward the center. It is delightfully fragrant and blooms almost continuously, even through the hot months of summer. The bush is low and wide-spreading, thickly covered with small, dark green foliage. This mat-like appearance makes it perfect for borders and ground-covers, as well as for group planting and single specimens.

DAYLILIES

ITEMS DESCRIBED IN CATALOGUE
ON PAGES 38 AND 39

Single Divisions (Bibs)

Heading our Daylily list for 1945-46, is the group of four, originated by John V. Watkins at the University of Florida. They are, Kanapaha, Mrs. John J. Tigert, Swan and Welaka.

Kanapaha is an all red Daylily. The blooms of clear cardinal-red are distinctive in that all of the segments are self-colored. There is no eye zone of deeper tone and there is no midrib of lighter value. Kanapaha blooms a month before closely comparable varieties that grow in the Daylily Display Garden at the University of Florida.

Preceding Kanapaha have been the very striking Mrs. John J. Tigert, the outstandingly beautiful and graceful Swan, and Welaka with its rosy orange tones.

Kanapaha, Mrs. John J. Tigert, Swan and Welaka. \$1.50 Each.

TERMS OF BUSINESS

LOCATION

General Office and Nurseries at Glen Saint Mary, Baker County, Florida, on Seaboard Air Line Railway, and State Road No. 1, 30 miles west of Jacksonville. Office and Citrus Nurseries at Winter Haven, Polk County, Florida. Visitors are always welcome.

APPLYING PRICES

Orders for five (5), fifty (50), and five hundred (500) plants of one class command the 10, 100, and 1000 rates respectively. Prices herein are for the Retail trade only and cancel all previous lists and catalogues. They are based on current conditions and therefore subject to change without notice.

CASH

or satisfactory reference must accompany all orders for immediate shipment unless the person ordering has an account. On orders booked in advance of the shipping season, 25 per cent down, with the balance due when the shipping season opens, will be required. Reserve orders are accepted only upon conditions that they shall be void should injury befall the stock before shipment, from any cause not under our control. Stock held in our fields on reserve long enough to grow to a larger grade will be billed accordingly at shipping time.

BE SURE

to state clearly when ordering how you wish shipment made. Parcel Post, Express, Commercial Truck Line or Freight. Lacking this information, we will use our best judgment as to method of forwarding. On orders for shipment by Parcel Post, add 25 per cent to the list price to cover cost of packing and postage. Heavy shipments that would be expensive by Express can usually travel via Commercial Truckline nearly as quickly as by Express and for less cost. Please use our order blanks; additional ones will be mailed on request.

SHIPPING AND PLANTING SEASON

From the middle of November to April for bare-root plants covers the average season but weather conditions each year govern beginning and ending dates. Balled and Burlapped plants and trees may be safely moved almost every month of the year.

SUBSTITUTION

It is our desire to furnish stock exactly as ordered, but in case varieties are exhausted, please state definitely on your order blank or in your letter if you wish us to substitute. Lacking this information, shipment will be made short—without substitution.

GUARANTEE

We guarantee our stock to be well grown, true to name, properly packed, and shipped according to instructions. In no case shall our liability be more than the original invoice value. There shall be no nursery stock sold under a guarantee to live, except with the understanding that, if it dies, it will be replaced **as soon as possible**, at not less than 50% of purchase price. Claims for replacement must be made in writing within three months after receipt of plants.

CLAIMS

If, by any possibility, errors should occur, they will be promptly rectified, if claim is made within 10 days after the receipt of goods. Our responsibility, except as stated above, ceases upon delivery of nursery stock in good condition to public carrier.
